

GO (lang)

★ healthCheck

→ Status 200 indicates

the server is properly

running & handling

requests

★ = pointers

(*)

*todo

→ is pointing
to todo obj

□ Struct format

type [insert-name] struct {

i. var-name ii. type iii. formatting

ex: ^{i.} ID ^{ii.} int ^{iii.} 'json: "id" '

:

}

type inference
[todos := [] Todo {}]

↳ "todos are a slice of
Todo"

↳ appendable & returnable

△ Go type checks everything
for you out of the box

⇒ "Body" field for structs
should be of type
String

Patch Requests

- Updates a field for todos
↳ done / not done
for a task

★ Great Hook Library

→ mantine hooks

mm UI Representation mm
